

# APPAREL

Whether in a gymnasium or park, indoors or outdoors, a sports garment with new functional fibers will significantly enhance comfort during exercise. The ultra-elastic fabrics developed by VICTOR offer soft and flexible characteristics that allow the body to stretch and move freely, even during rigorous exercise. The new generation of breathable fabric absorbs and transmits sweat from the core just like breathing. It also dries quickly, emits heat and takes in cooler outer air to keep the skin dry.

## CLOTHING TECHNOLOGY

### COOL MAX

Transports moisture away from the body, keeping you cool and dry.  
Meets INVISTA performance standards for moisture management and breathability.

### THERMO LITE

- Lightweight insulation for cold weather warmth.
- Superior movement of moisture to keep you warmer.
- Tested by INVISTA for fabric quality standards.

### RUDOLF CHEMIE

The biocide with broad range of action against bacteria, mould and yeast fungi as well as dust mites-suitable for textiles worn next to the skin.

### SUPER HEAT

SUPER HEAT is a high technological material which absorbs sunlight and turns it into heat. It reflects the ultra red rays of human body back preserving the heat and keeping body warm. SUPER HEAT material is good at keeping warm. It stores the heat and increases blood circulation. SUPER HEAT is the first choice of autumn and winter.

### DYNASPAN

Select high-quality VICTOR DYNASPAN high tension fabrics weaved with spandex elastic fiber to enjoy more comfortable and uninhibited play.

### PERFECT-DRY

Regardless of your sport, wearing Perfect-DRY fiber will help you feel fresh and comfortable. The structure of VICTOR Perfect-DRY fiber absorbs and transmits sweat from the core, dries fabric quickly, emits heat and takes in cooler outer air to keep skin dry.

### MICROFT

MICROFT is made from light and micro fiber. It's the properties of lightness, softness and high-density allow various sports demands.

### JADE COOL

The polyester and VICTOR NANO-JADE ELEMENT are combined, the mix-material makes the yarn has excellent suction performance, fine thermal conductivity, which make the body feel cooler. The JADE COOL has natural antibiotic function, the trace elements and minerals can achieve the function of anti-bacterial.

### ANTI-BACTERIA

The antibiotic and odorless capability of VICTOR's fabrics restrain bacteria caused by perspiration that remain in the fabric, helping to reduce gamey smells for a more airy atmosphere.

### ANTISTATIC

Prevent clothes in the dry climate produce static, prevent clothes sticky body, make clothes to wear soft and comfortable.

### COOL CELL

VICTOR's COOL CELL fiber technology reduces temperatures by 2-3°C, enabling you to keep you cool in the heat of the moment.

### SEAMLESS SPLICING

Significantly reducing friction by bypassing the traditional use of a sewing machine, VICTOR's SEAMLESS SPLICING binds two pieces of fabric with ultrasound.

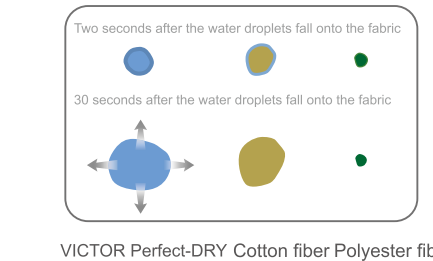

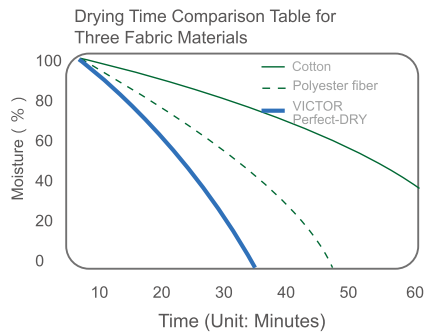

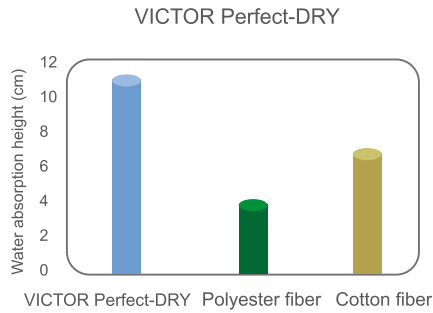

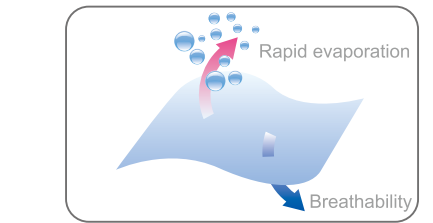

### SPEEDY FRESH

“SPEEDY FRESH” has excellent moisture vapor transmission ability and dries quickly when getting wet. Not a dose of chemical is used to achieve this effect. The special weaving skill allows it to siphon off the moisture rapidly from the back of fabric to the surface, keeping the wearer dry all the time. Most important of all, the function works forever due to special texture casing. We also make sure the surface is smooth enough to prevent snagging & pilling.

MATERIAL INSPECTION

Unique Cross-sectional Structure Ensures Dryness

The structure of the VICTOR Perfect-DRY fiber features a unique cross-sectional structure which absorbs, diffuses, and expels moisture to keep the skin dry.

Water Absorbability Test

The unique cross-sectional structure produces a siphoning effect. 30 minutes into the water absorption test, the VICTOR Perfect-DRY fabric exhibits a superior water absorption level compared to polyester or cotton fibers.

Speed Dry Test

After comparing three different materials, it was discovered that the VICTOR Perfect-DRY fabric only required 35 minutes to dry. This is approximately 1.5 times faster than polyester fibers and 2.5 times faster than cotton fibers, which in turn allows the fabric to dry quickly, as well as to stay fresh and cool.

Water Repellent Ability Test

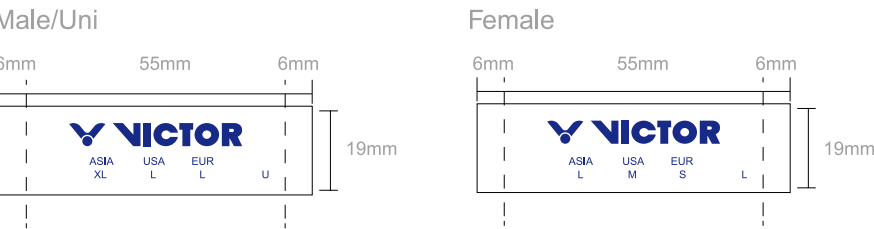

Two seconds after the water droplet hit the fabric surface, VICTOR Perfect-DRY fabric exhibits faster moisture absorption performance than cotton or polyester fibers. Furthermore, after 30 seconds, the moisture is effectively diffused to the surface of the fabric.
